EDUCATION

Northeastern University, Boston, MA September 2018 — Present
Candidate for a Bachelor of Science in Computer Science, GPA: 4.0/4.0
Khoury College of Computer Sciences Expected May 2022
Relevant Coursework: Networks & Distributed Systems, Computer Systems, Object-Oriented Design,
Algorithms & Data, Database Design, Logic & Computation,
Fundamentals of Computer Science
Honors: Dean's List, Honors Program
Activities: Symphonic Orchestra, NU Stage (student-run musical theater company)

SKILLS

Programming Languages: JavaScript/TypeScript, Java, SQL, HTML, CSS
Technologies/Software: React, Git, AWS (EC2, S3, Lambda, Elasticsearch, Redshift)
Spoken Languages: English (native), Spanish (proficient)

WORK EXPERIENCE

Software Developer Co-op, **PowerAdvocate**, Boston, MA January 2020 — August 2020

- Develop, test, and code review full-stack applications within an agile environment
- Architect and design an entirely new microservice to replace existing third-party service that analysts use to enhance a factbase containing \$4+ trillion of spend
- Develop an internal application used by 70+ employees to gather and enhance location data for suppliers
- Migrate and re-structure data from existing Oracle database into Redshift, memSQL, and Elasticsearch
- Implement endpoints to query data across multiple Elasticsearch indices and a memSQL database
- Communicate with other developers to effectively split up workload and complete features on time
- Give frequent updates and reliable estimates to product owner in order to better prioritize the feature list

Head Course Assistant for CS 2800: Logic & Computation, **Northeastern University** January 2019 — December 2019

- Run weekly lab of over 20 students to reinforce lecture material
- Hold weekly office hours to provide focused assistance for students and grade assignments and exams in an efficient and timely manner
- Tutor students who need additional practice in a one-on-one setting

PROJECTS

boardgames May 2020 — Present

- Create web-app that allows users to play boardgames online; developed using React, Node.js, and Socket.IO
- Currently implementing Love Letter and Codenames, with plans for future games to be added

LanguageX June 2020 — August 2020

- Design and develop backend for a language-learning startup targeting functional learning over level-based courses
- Maintain a mongoDB database running on an AWS EC2 instance to support a Node.js backend
- Communicate regularly with founder and designers to ensure development is aligned with product vision

INTERESTS

Cello, Crosswords, KenKen, Theater Music
